

Your INL Update — Week of February 7, 2011

This is Nicole Stricker with your INL Update.

Two national media outlets will be visiting Idaho National Laboratory this week. Reporters and producers from CNBC and the Christian Science Monitor will learn about cybersecurity capabilities. And the Christian Science Monitor reporter will stick around to tour INL's nuclear research facilities and the Center for Advanced Energy Studies.

Our community's energy advocates were recognized last week by the Partnership for Science and Technology. INL Fellow and nuclear scientist David Petti was recognized for his advanced nuclear reactor work and "exceptional leadership and devoted service to the advancement of energy initiatives."

Computers that can learn sounds like something from a Hollywood movie. But Dr. Milos Manic, a University of Idaho researcher at INL's Center for Advanced Energy Studies, uses algorithms based on the human mind to help computers mimic human intelligence and reasoning. You can learn more in a new feature story on INL's home page.

This was your INL Update. You'll find more information at inl.gov, including community announcements and the latest INL news.
