

Your INL Update — Week of Feb. 14, 2011

This is Misty Benjamin with your INL Update.

Idaho students will be showcasing their smarts when the Idaho National Laboratory's Scholastic Tournament kicks off this week. Over the next 45 days, around 700 Idaho high school students will compete for a trip to DOE's National Science Bowl in Washington, D.C. Of the nearly 30 Idaho teams that compete in the state championship, only one will move on to the National Science Bowl.

People living in Meridian will have an opportunity to learn about INL's current and future missions. Rick Provencher, manager of the Department of Energy's Idaho Operations Office, is the featured speaker at the Idaho Business League's monthly forum this week.

You can learn how INL supports space travel in a new feature about the life and work of INL nuclear engineer Shannon Bragg-Sitton. She develops and assembles power systems for space exploration. You can read more about Shannon and her exciting work in a new feature on INL's home page.

This was your INL Update. You'll find more information at inl.gov, including community announcements and the latest INL news.
