

Your INL Update — Week of August 30, 2010

This is Misty Benjamin with your INL Update.

This week, the Pocatello Chamber of Commerce hosts a lunch for new teachers to get to know community members. Idaho National Laboratory will be in Pocatello for the event to tell new teachers about the i-STEM program. Through the program, INL offers support for Idaho teachers in science, technology, engineering and math.

Amanda Lang, an engineering physics major at the University of Wisconsin-Madison, won a \$3,000 scholarship from the Center for Advanced Energy Studies. Lang said she plans to pursue a career in either radiation science or nuclear power. Learn more about her research at the lab in the features section of INL.gov.

American Nuclear Society will host a decommissioning, decontamination and reutilization or DD&R meeting in Idaho Falls this week. The forum supports conversations about sustainable practices and new technologies for nuclear management. Participants will have an opportunity to tour INL and learn about the research missions, as well as, take a look at the clean-up contractors' operations at the Site.

This was your INL Update. You'll find more information at INL.gov.
