

Your INL Update — Week of Nov. 1, 2010

This is Nicole Stricker with your INL Update.

Small business owners can learn about opportunities to work with Idaho National Laboratory during this week's Idaho Business Opportunity conference. INL's small business program manager will lead a workshop highlighting ways Idaho businesses can target products and services toward the lab. The 22nd annual conference is Thursday in Coeur d'Alene.

You can save money and conserve power at home and at work with the help of a new partnership between INL's Center for Advanced Energy Studies and the state of Idaho. The new Energy Efficiency Research Institute is a Boise-based public-private partnership that will evaluate commercial energy-saving technologies.

Do you know a teen ready to reach for the stars? Idaho high school juniors can now register for the second annual Idaho Science and Aerospace Scholars academy. INL is an original partner in the competitive program, which offers NASA-based courses and a chance to visit NASA's Ames Research Center in California. You can learn more in a new feature story at INL's home page.

This was your INL Update. You'll find more information at INL.gov, including community announcements and the latest INL news.
