

IRUG Licenses Summary

Kathleen Bohachek

In the third quarter for both domestic and international IRUG membership we modified the counting method. Memberships/licenses for the BETA product, based on RELAP5-3D version 3.0.0, are no longer counted because that product is no longer supported. Replacing those are the memberships/licenses for the newest released product series based on RELAP5-3D version 4.0.3. This makes the overall count lower than last quarter because not all the BETA licenses have yet been converted. Note that memberships/licenses for RELAP5-3D version 2.4 are still counted; that product is still being distributed.

Domestically, two new members joined IRUG and had licenses processed. Further six existing members, who were approaching expiration, renewed. Table 1 shows these two groups of domestic members, as well as those whose licenses are still in force.

Table 1: Domestic IRUG Membership

Domestic	New Members	Renewals	Existing Members	Totals
University	1	1	12	14
Government	1	2	6	9
Commercial	0	2	8	10
Simulator (RT)	0	1	2	3
Sub-Total	2	6	28	36

In the third quarter internationally, three new members joined IRUG and had their licenses processed. Further three existing members, who were approaching expiration, renewed. Table 2 shows these two groups on international members as well as those whose licenses are still in force.

Table 2: International IRUG Membership

International	New Members	Renewals	Existing Members	Totals
University	3	1	5	9
Commercial	0	2	16	18
Simulator (RT)	0	0	1	1
Sub-Total	3	3	22	28

Total Licenses	5	9	57	64
-----------------------	---	---	----	----

Finally, there are a number of memberships still in the processing pipeline. Once these are completed, they will be included in the ranks of Tables 1 and 2 in the third quarter report.
